

Turning complex technology into products people can use.

Jerome Kuo is a product and project manager spanning generative AI, game analytics, creative technology, semiconductor research, and hardware supply chains. He connects emerging technical capabilities with user needs, cross-functional execution, and business outcomes.

Taipei, Taiwan	guocheju@gmail.com	github.com/jjfishjj	LinkedIn: Jerome Kuo
----------------	--------------------	---------------------	----------------------

CORE POSITIONING

AI PRODUCT / TPM	SOLUTION ARCHITECTURE	TECHNICAL MARKETING / DEVREL
AI product lifecycle, cross-functional delivery, data-driven decisions, and product awareness of GPU economics and the hardware ecosystem.	Turns GenAI tools, prototypes, and customer needs into clear solution narratives; developing deeper NIM, RAG, and inference-service integration.	International events, awards, workshops, product storytelling, and bilingual content experience connecting technology, community, and market.

NVIDIA DLI COMPLETED

Fundamentals of Deep Learning / Rapid Application Development with LLMs / AI Development with Jetson Nano

DISTINCTIVE FOUNDATION

GENAI WORKFLOWS	PRODUCT ANALYTICS	HARDWARE + SEMICONDUCTOR
Text, image, video, 3D, and code prototyping; workflow design and internal AI enablement.	GA events, RFM, segmentation, retention, funnels, dashboards, and SQL/Python/Tableau-oriented analysis.	TiO2 thin-film research plus CPU, GPU, motherboard, and component supply-chain experience.

EXPERIENCE

2025 - NOW

CodeNet

Project Manager | Taipei

Lead product planning, data integrations, and development coordination for campus-community and matching products.

- Designed career-path and event segmentation experiences to improve retention, browsing depth, and student engagement.
- Led frontend and moderation workflows, integrating course reviews, education data, and an AI interview service.
- Improved matching logic, analytics tracking, identity verification, and product subdomain migration.

2024 - 2026

Gamania Digital Entertainment (HK)

AI, Data & Media Project Manager | Taipei

Led AI and data initiatives across game production, internal workflow optimization, and creative asset development.

- Integrated AI into Google Analytics workflows using events, funnels, cohorts, and retention signals for decisions.
- Designed player-behavior analytics and dashboards while aligning data definitions and reporting logic.
- Introduced AI-assisted video iteration and coordinated game prototypes, creative production, and instrumentation.

2023 - 2024

A.V. Mapping

Project Manager | Taipei

Planned creator workflows and go-to-market narratives for an AI video/music matching platform.

- Supported communications for the 2024 iF Design Award and Berlinale / European Film Market.
- Planned creator tools, interactive journeys, gamified campaigns, AI workshops, and partner events.

2020 - 2023

METASENS / MetaFame

Deputy Marketing Lead / Project Manager | Taipei

Connected Web3 product planning, NFT operations, token campaigns, and gaming-community growth.

- Designed gamified journeys, reward mechanics, community missions, and NFT campaigns.
- Analyzed campaign and behavioral data to support product and marketing decisions.

2018 - 2023

Imperium Technology Group

Data Analyst | Hong Kong / Shenzhen

Supported digital products and regional decisions through user analytics and market research.

- Applied Google Analytics, RFM, segmentation, retention, and tagging analysis.
- Improved platform sustainability from 10% to 60%.

2014 - 2018

Huiria Financial Leasing

Electronics Procurement & Product Manager | Shenzhen

Managed computer-hardware procurement and product planning across an international supply chain.

- Covered CPU, GPU, motherboard, semiconductor, and wafer-related component categories.
- Coordinated suppliers across Taiwan, China, and Europe; reduced air-freight costs by about 20%.

2012 - 2014

Chenghsi.com

Project Manager / Co-founder

Developed Yogosong, a social music app concept built on the Facebook API.

- Contributed to product features, market research, and early operations.

RESEARCH, EDUCATION & CREDENTIALS

SEMICONDUCTOR RESEARCH FOUNDATION

Researched carbon-doped TiO₂ semiconductor thin films at National Chiao Tung University's Solid State Laboratory using XANES, XRD, ESCA/XPS, synchrotron analysis, and magnetic measurements. Studied crystal structure, defect states, dipole/spin behavior, and potential sensing applications.

2012	Tsinghua University	Exchange Program
2009 - 2011	National Chiao Tung University	Electrophysics
2005 - 2009	National Central University	Electrical Engineering

ADDITIONAL CREDENTIALS

Google Ads Display / Search Certification / Taiwan English Tour Guide / Epson CSR Japan Project / Milano Expo 2015 Volunteer & Museum Docent
